

The background of the entire page is filled with a pattern of small, light gray geometric shapes. These shapes include rectangles, squares, and L-shaped blocks, some of which are slightly offset from each other, creating a sense of depth and movement. The shapes are distributed across the entire page, with a higher density in the upper right and lower right areas.

soft-wheeler

Tires, wheels and accessories at the ready.

soft-wheeler

Do you do everything you can to satisfy your customers – and more wherever possible? Then perhaps you will soon be storing your customers' wheels – an add-on business that can also increase customer satisfaction!

Are you already storing them, and do you want to make a selection of the stock based on specific search criteria?

Are you looking for a simple import option or a way to create manufacturer and supplier catalogs in order to market new tires and complete wheels? Or for different ways of calculating purchase or special prices?

soft-wheeler is the solution you need if you want to optimize how you organize your seasonal hardtop, tire and wheel stock, including storage, analysis, price calculation and quotation preparation.

Tires and wheels always at the ready.

- Cross-company storage of wheels, tires and other accessories with cross-references to customer, vehicle and storage data
- Storage check-in confirmation with detailed information on the stored item, storage location and condition of the item
- Management of manufacturer and supplier catalogs for the marketing of new tires and complete wheels with individual calculations for purchase or special prices
- Selection of stock on the basis of specific search criteria with a printing and export function for mailing customers and creating price labels and offers
